

≥ The **International Good Governance and Fight Against Corruption Conference** is held in the context of the project “Sociedade Civil pela Transparência e Integridade”, financed by the European Union and the Portuguese Cooperation.

≥ This initiative takes place on April 12th and 13th 2022 and it aims to increase both knowledge and the exchange of good practices in the fight against corruption and impunity. The conference wants to create synergies between actors of different areas- public and private. It is also intends to raise awareness amongst both the general public, as well as policy makers in São Tome and Príncipe on the issues of transparency, corruption and access to information by the citizens.

≥ Over the two days, the conference, open to the public, will promote the debate between CSOs, journalists, researchers and other actors from different geographies, enabling them to share experiences and establish bridges for dialogue and future collaboration.
